HACKLIN LOGISTICS

Company introduction

Customized project transportation solutions worldwide

Hacklin is a worldwide provider of reliable logistics and transportation services. With vast project cargo experience we offer tailor-made solutions for projects of all size and complexity.

We offer engineering and planning of services for extensive project transportation as well as packing and loading supervisions in ports worldwide. We provide method statements and stowage plans, project execution & on-site services. With our wide partner network we offer customs clearance and assistance with documentation in any destination globally.

Our experienced team is a solution-oriented group of forwarding professionals, who will serve all customers with accuracy and excellent can-do attitude.

Global focus • Local solutions

On top of our services at Hacklin Logistics we can always relay on co-operation with our sister companies inside Hacklin Group in Finland, Hong Kong and China.

Hacklin Logistics operates via networks providing its customers with global focus and local solutions.

SUSTAINABILITY

Logistics is an essential component of supply chain management. It is used to manage, coordinate and monitor resources needed to move products in a smooth, timely, cost-effective and reliable manner. Finding ways to create processes and services which would be less damaging to the environment is everyone's concern.

Hacklin Logistics strives to minimize using energy and natural resources in its operations. We focus on developing processes that are less harmful to the environment and safe for employees and customers. Such methods and techniques, among other things, are route planning and load optimization, packaging, reuse, recycling and proper disposal of waste.

Hacklin Logistics contributes to offset on the emissions of project shipments. Part of the project execution report includes emission calculations.
