

International Logistic Solutions

Rowners is the combination of professionals with over 20 years of experience in the international logistics industry. We benefit from the specialized skills and knowledge of each of our colleagues. We believe that the service rendered to our customers is better when we complement our efforts.

Rowners analyses each case and uses the mode of transport that best suits taking into account costs, characteristics of the merchandise, risks, etc. The chosen mode may be air, land, sea or river or multimodal transport.

In **Rowners**, we prefer to have a few but well served customers prioritizing a partnership rather than a client-service provider relationship. Likewise, we develop same type of relationship with our suppliers. We are looking for long term win-win businesses.

We specialize in certain niches of international logistics such as project cargo, customized import services for industries and logistics that can be more competitive through the waterway river system.

Project Cargo - Our experience

The more complex is the logistics the more we enjoy it. The following are some of the challenges **Rowners** had during these years.
