## Services offered:

ANTONOV Airlines specializes in the transportation of the outsized and project cargoes worldwide using the fleet of seven AN-124 aircraft with up to 150 tonnes payload, 60-tonne payload AN-22, and unique 250-tonne payload AN-225, which is the largest aircraft in the world.

More than 30 years after launching as the first company to offer the AN-124 commercially, ANTONOV Airlines continues to deliver air cargo solutions across the aerospace, defence, energy, humanitarian, industrial, automotive, and oil and gas sectors.

## Latest Projects:

In September Shortly after a fire broke out at a gas facility in Vaca Muerta, Argentina, an Antonov Airlines An-124-100 flew mobile crane and fire extinguishing equipment from George Bush International Airport (IAH) to Presidente Peron International Airport (NQN) for Crane Worldwide.

The combined weight of the well control equipment was 70 tonnes, and included booms, tracks, Control stations and water pumps.

The equipment was loaded and ready for departure within 48 hours of the air transportation Agreement being signed.

## Latest Projects:

Transporting of Airbus Defence and Space's newest satellite, ANASIS-II from Toulouse to the USA.

The satellite container used to deliver ANASIS-II measured eleven metres in length and weighed 18 tonnes. Including launch equipment, it was part of an overall payload of 36 tonnes.

## Latest Projects:

Unique cargo delivery of two Max Bögl TSB maglev trains from Munich, Germany to Chengdu, China.

Taking into consideration the dimensions of the light weight high tech train sections as 12.6 x 2.8 x 3.7 m per section and total payload of about 36 tons of the two sections such transportation was possible only with AN-124-100 aircraft.
